Hi Mark,

Thank you for following up with my request to separate the launching ramp permit application. This permit is ready to be issued and you may request for slab inspection once the permit is pulled.

The valuation for the launching ramp is \$100,000 and to compensate you for the fees charged under this permit we will reduce the valuation for the Marina permit application (B06-1940) by \$100,000 and adjust the fees accordingly.

If you have any question regarding this issue, you may contact Permit Tech. Steve Newsom at 780-7231.

Steve,

Please adjust the valuation and fees for permit application B06-1940.

Thanks,

fs

Hello Fred

As you requested via Pete Bohley, I did apply for a separate permit for the launch ramp at Westpoint Marina and paid a new fee last week. This element of the job is now removed from the larger construction documents for Phase 1 of the project presently in engineering.

As agreed, please refund that portion of the Phase 1 construction document fee paid two weeks ago which was for the launch ramp (cost is \$96,000.00).

Thanks very much,

mark sanders
